

HOLISTIC EXPERTISE OF NEUROOTOLOGY

(INTERNATIONAL TEACHING COURSE)

9-11. NOVEMBER 2017. **BUDAPEST**

Dear Colleagues,

Neurootology is a border-line problem of several specialties. Nowadays, when the patients' number suffering from vertigo is increasing all over the world, the doctors who can deal with patients in correct way are missing. To make this situation better, the Neurootological and Equilibrimetric Society must be a mission to organize international teaching course in basic level for doctors of general practice and emergency care units, otolaryngologists, ophthalmologists and neurologists. The language of the course is English.

I invite every medical doctor to participate on an international teaching course in Budapest. The aim of this course is to increase the number of doctors who are interested in neurootology and have competence to deal with these patients.

Please, spread the information in your environment. It is a basic course for young otolaryngologists, neurologists, and general practitioners. I attach the invitation flyers and the program of the course.
